

MINDO BIRD PHOTOGRAPHY TOUR – 4 DAYS

**From the Andean Highlands to
Mindo's Chocó Cloud Forest**

Exploraves

A Photographic Journey Through Ecuador's Cloud Forests

This bird photography adventure begins high in the Andean cloud forests of Yanacocha Reserve, where photographers can search for remarkable species such as the Tawny Antpitta, Sword-billed Hummingbird and a variety of colorful mountain tanagers. As the journey descends toward Mindo's lush Chocó cloud forests, an entirely different bird community emerges. Brilliant hummingbirds, toucans, trogons, antpittas and the spectacular Andean Cock-of-the-Rock provide endless opportunities for unforgettable photographs in one of the world's most biodiverse regions
